

ANONYMIZER®

SpyWare Killer

Keep Your Data Secure & Protected

Anonymizer SpyWare Killer removes spyware, Web bugs, worms, adware, scripts, and other intrusive devices that can be found on your PC. These types of software enable hackers and web snoops to monitor your surfing habits and collect your personal data! Stop the snooping and protect your privacy today with Anonymizer Spyware Killer!

Key Benefits:

- Can be used on home and corporate PCs & laptops.
- Detects and removes spyware, trackware & adware.
- Guards your information from online snooping.
- Protects against malicious spying and tracking.
- Tracks anything in your PC that seems out of place.
- Mark known, trusted programs to prevent removal.

What Is Spyware?

Many Internet users have downloaded free software or have been subject to cookies and interactive content. What most users may not realize is that some of these files could contain code that allow the makers of this software to collect and disseminate information about those using them. These programs can track your surfing habits, abuse your Internet connection by sending this data to a third party, profile your shopping preferences, hijack your browser start page or pages, alter important system files, and can do this without your knowledge or permission.

Cease The Snooping!

SpyWare Killer detects spyware and tracking programs that antivirus software won't discover since they masquerades as real programs. To prevent the removal of programs you know and trust, SpyWare Killer has highly customizable options that allow you to always protect or delete particular programs. With the addition of free updates via the Internet, you can always be sure that your PC is 100% spyware free!

Total Spyware Protection

With one-click scanning, customizable settings, and detailed feedback information, controlling spyware has never been easier.

Completely Automatic

Stop spyware forever with automatic scheduling, free definition updates, and detailed scanning options.
